Year after year, R+T Asia confirms its position as the leading international gathering in Asia for the sun shading and door/gate industry. Despite the global economic challenges of recent years, the show has continued to grow steadily in both exhibitor and visitor numbers.

The 2025 edition recorded a 10% year-on-year increase in visitors, following the impressive 23% growth in 2024. These results demonstrate the show's strong momentum and underline its unmatched importance for the industry in the APAC region and beyond.

Powered by the international strength of the R+T brand, R+T Asia is organized to the highest standards. Its comprehensive program, product showcases, and networking activities make it the most attended and trusted platform in APAC for professionals in the field.

In 2025, beyond the strong presence of B2B professionals, the show welcomed participants from Asia (58%, including the Middle East), Europe (21%), Oceania (8%), North America (8%), and other regions. This international diversity provides exhibitors with a reliable and qualified audience to connect with the markets and partners they want to reach.

With its consistent growth, global reach, and strategic role in the APAC market, R+T Asia remains the most powerful platform for business development, innovation launches, and industry connections in the sun shading and door/gate sector.
